# Creating a Student Digital Business Card

Have you considered a digital business card? It is a way to share and save contact information in real-time quickly. They are customized with your unique information. You can share them with others via a URL or QR code, being able to download your information in just a click. There are many apps to choose from, the example below uses HiHello.

One Tap.
Limitless
Connections.

Say goodbye to ordinary business cards. Instead, start sharing **all your contact** information with a single tap using **Social**

In addition to ordinary business cards, start sharing all your contact information with a single tap using digital business cards.

HiHello: Digital Business Card
Biz Cards & Contact Manag...
GET
